MicroLife is a multi-strain probiotic containing dozens of species of beneficial microorganisms. By allowing beneficial microbes to dominate the soil and plants, MicroLife helps to improve the overall health of your plants and crops, whilst also improving germination, root development, maturing and flowering.

Key ingredients:

- ✓ Photosynthetic bacteria
- ✓ Lactobacillus spp.
- ✓ Yeasts
- ✓ Nitrogen fixing bacteria

Key benefits:

- ✓ Faster uptake and availability of nutrients.
- ✓ Better soil structure (water holding capacity, carbon, nitrogen fixing).
- ✓ Allows beneficial microbes to dominate the soil and plants.
- ✓ Promotes natural germination, root development, maturing and flowering.
